Farnam® Simplify® Feed-Thru Fly Control is a highly palatable feed additive to prevent the development of stable flies and horse flies in the manure of treated horses. Farnam® Simplify® Feed-Thru Fly Control breaks the fly life cycle by preventing the formation of fly larvae (maggots) when they molt resulting in their death. This product contains no organophosphates and can be used as part of an integrated pest management program. Farnam® Simplify® Feed-Thru Fly Control is a reduced-risk pesticide.

READ ENTIRE LABEL BEFORE EACH USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DO NOT USE ON HORSES INTENDED FOR SLAUGHTER

Feed the recommended dosage of Farnam® Simplify® Feed-Thru Fly Control to each horse separately to make certain it receives the full ration. This product should be fed top dressed or granulated to the horse's total ration to provide 6.6 mg of dibromochloropropene per 100 lbs. of body weight. For occasional feeding, enterers who do not accept new feeds readily, mix this product with sweet feed or grain ration.

Start feeding Farnam® Simplify® Feed-Thru Fly Control early in spring before flies appear and continue feeding throughout the summer and into the fall until cold weather reduces fly activity.

This product contains dibromochloroprene, an insect growth regulator, which prevents the development of horse flies and stable flies in the manure of treated horses, but is not effective against existing adult flies.

In some cases, supplemental fly control measures may be needed in and around paddocks and buildings to control adult horse and stable flies which can breed in other decaying vegetable matter or Sludge on premises, or migrate from other areas.

Farnam® Simplify® Feed-Thru Fly Control should be used in conjunction with other proven and non-residual products as well as good management and sanitation practices.

FEED INGREDIENTS: Wheat Middlings, Dehydrated Alfalfa Meal, Calcium Carbonate, Sodium Chloride, Calcium Propionate (preservative).

DAILY DOSAGE

300-500 LBS. Feed 1/4 oz. per horse per day.
500-700 LBS. Feed 1/2 oz. per horse per day.
700-900 LBS. Feed 5/8 oz. per horse per day.
900-1100 LBS. Feed 1 oz. per horse per day.
1100-1300 LBS. Feed 1 1/4 oz. per horse per day.

For larger horses over 1,100 lbs. of body weight, feed an additional 1/4 oz. for each additional 200 lbs. of body weight.

STORAGE & DISPOSAL

Do not contaminate water: food or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container in a cool dry place inaccessible to children and pets.

PESTICIDE DISPOSAL: Washes resulting from the use of this product may be disposed of in an office or an on-site waste disposal facility.

CONTAINER HANDLING: Nonrefillable container. Do not use or refill this container. Completely empty plastic bucket by shaking and tapping sides and bottom to loosen clogging particles. Then offer for recycling if available or dispose of in a sanitary landfill or by incineration if allowed by state and local authorities by burning. Do not burn; stay out of smoke.
