FEEDING DIRECTIONS

Enclosed scoop holds one ounce.

Feed one ounce of Mare Plus® supplement twice daily with regular ration – once in the morning and again in the evening.

CAUTION

Follow label directions. The addition to feed of higher levels of this premix containing selenium is not permitted.

GENERAL

Mare Plus® supplement – a concentrated, scientifically formulated and balanced vitamin-mineral concentrate, crumbled and flavored for taste appeal. Keeps broodmares in optimal condition during all stages of breeding.

FOR BROODMARES

Nutrient requirements of the broodmare increase significantly during gestation and lactation. Plus, in order to conceive, the mare must be in optimum condition. Mare Plus® supplement supplies vitamins A and E to supplement and augment these vitamins found in the natural diet. Mare Plus® supplement also provides a source of calcium, phosphorous and vitamin D₃ demanded by the requirements of the unborn foal.

FOR LACTATING MARES

Following the mineral and vitamin requirements of pregnancy, a lactating mare is called upon to produce several liters of milk daily, and she will at the expense of her own vitamin-mineral requirement. Mare Plus® supplement is designed for fast assimilation by the dam to supplement her diet and meet the vitamin-mineral requirements of the suckling foal.
