**INDICATIONS:**

IverCare® (ivermectin paste) 1.87% is a potent anthelmintic and boticide for the treatment and control of the following parasites in horses. Contents will treat up to 1,500 lb body weight.

- **Anthelmintic and Boticide:**
  - Removes worms and bots
  - Treats up to 3 OF U.S. AND 7 IMPORTED INGREDIENTS

- **Active Ingredients:**
  - Ivermectin

- **Para-sites Controlled:**
  - Strongylus vulgaris, Strongyloides westeri, Parascaris, Ascarids, Hairworms, Lungworms, Oxyuris equi, Draschia spp. including C. labiatus and C. labratus; and C. nassatus
  - Cylicocyclus spp. including C. brevicapsulatus, C. minutus, C. coronatus, Cyathostomum spp. including C. calicatus, Cylicodontophorus, C. goldi
  - Fourth-stage larvae of Oxyuris and Oesophagostomum spp.
  - Fourth-stage larvae of Strongyloides westeri
  - Cylicocyclus (oral and gastric stages) – C. labiatus, C. labratus; and C. nassatus
  - Cylicocyclus (adults, including those resistant to some benzimidazole class compounds) – C. labiatus, C. labratus; and C. nassatus

- **Dosage and Administration:**

  1. While holding plunger, turn the knurled ring on the plunger 1/4 turn to the left and slide it so the side nearest the barrel is at the prescribed weight marking.
  2. Lock the ring in place by making a 1/4 turn.
  3. While holding plunger, turn the ring on the syringe tip 1/4 turn to the left and slide it so the end nearest the barrel is at the desired dose marking.
  4. Lock the ring in place by making a 1/4 turn.
  5. Insert the syringe tip into the horse's mouth at the space between the teeth.
  6. Depress the plunger as far as it will go, depositing paste on the back of the tongue.
  7. Immediately raise the horse's head for a few seconds after dosing.

- **Recommended Use:**

  - Effective for the treatment and control of parasitism. IverCare® (ivermectin paste) 1.87% provides effective treatment and control of the following parasites in horses.
  - Regular treatment will reduce the chances of verminous arteritis caused by Strongylus vulgaris.

- **Parasite Control Program:**

  - All horses should be included in a regular parasite control program with particular attention being paid to mares, foals and yearlings. Foals should be treated initially at 6 to 8 weeks of age, and routine treatment repeated as appropriate. Consult your veterinarian for a control program.

- **WARNING:**

  - Do not use in horses intended for human consumption.
  - Not for use in humans. Keep this and all drugs out of reach of children.
  - Refrain from smoking and eating when handling. Wash hands after use. Avoid contact with eyes. The Material Safety Data Sheet (MSDS) contains more detailed occupational safety information.
  - To report adverse reactions in users, to obtain more information, or to obtain a MSDS, contact Farnam Companies, Inc. at 800-234-2269.

- **Precautions:**

  - This syringe contains sufficient paste to treat one 1500 lb horse.

- **Treatment and Control:**

  - Effective for the treatment and control of the following parasites in horses.
